Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, drawn to a method for operating a fuel cell power generation system.

Group II, claims 5 and 6, drawn to a fuel cell power generation system.

The inventions listed as Groups I and II do not relate a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common subject matter between Groups I and II is a reforming section, a carbon monoxide reduction section and a combustion section. The common subject matter does not make a contribution over the prior art (see JP 11-265725, which is cited as an "X" reference on the international search report). Accordingly, Groups I and II lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve the right to petition the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
